## Education

Shiv Nadar University, Chennai

Bachelor of Technology in Computer Science and Engineering, specializing in Cybersecurity.

Expected August 2026

Chennai, Tamil Nadu

## Skills

**Languages:** C/C++, Python, Java, JavaScript, HTML/CSS, SQL, Solidity, Shell & Bash Scripting, Typescript.

**Tools & Technologies:** Burp Suite, Nmap, Wireshark, Metasploit, ELK Stack, Snort, Cisco Packet Tracer, CyberChef, Git, NodeJS, Flask, Django, FastAPI, HTML/CSS, GCP, MongoDB, MySQL, Neo4j.

**Soft Skills:** Project Leadership, Effective Communication, Agile Adaptability, Analytical Problem Solving, Collaborative Teamwork.

## Experience

### OneTrust

Software Developer Intern

June 2024 – Sept 2024

Bangalore, Karnataka

- Engineered secure **RESTful APIs** using **Java Spring Boot** to enhance **data flow** and consistency across systems, contributing to **automated regression testing** for improved **scalability, reliability, and deployment efficiency** of critical applications.

### IAS-INSANA-NAS

Summer Research Fellow

May 2024 – July 2024

Dharwad, Karnataka

- Contributed to research on **visual-based malware classification** with a **98% accuracy improvement**, focusing on scalable **image processing and distributed system** techniques to handle *data-intensive tasks, automation, and enhanced security protocols*.

## Projects

**SecuScan** | *Automated vulnerability scanning for project dependencies through a VS Code extension.*

- Developed a **VS Code extension** using **TypeScript & Webpack** that automates **vulnerability scanning** of project dependencies, resulting in a **40% reduction in manual scanning** efforts. Enhanced security insights through seamless integration with the **NVD API**, showcasing strong capabilities in building tools that bolster software security.

**WebShield** | *Phishing detection Chrome extension with ML integration.*

- Created a robust **phishing detection solution** via a **Chrome extension** utilizing **ReactJS, Bootstrap, FastAPI, & Firebase**, achieving an impressive **98% accuracy** across **5 machine learning** models. This project significantly strengthened **online security measures**, demonstrating proficiency in both frontend and backend development for security applications.

**SecureDash** | *Real-time monitoring dashboard enhancing Smart Grid security.*

- Designed and implemented a sophisticated **real-time monitoring dashboard** using **ElectronJS**, integrated with **Flask & PowerBI**. This dashboard improved **Smart Grid security** by **90%** through **advanced machine learning techniques**, underscoring expertise in data visualization and real-time threat analytics.

**PenGUIN** | *Linux application for streamlined OS hardening with a user-friendly interface.*

- Co-developed a **Linux application** using **PyGTK & Shell Script** to streamline **OS hardening on Ubuntu**. This tool provided a **user-friendly interface** with **one-click access to critical security features**, emphasizing skills in software engineering and system security to enhance OS resilience against threats.

**EncryptXfer** | *Secure file transfer solution with encryption protocols.*

- Engineered a **secure file transfer solution** utilizing **RSA encryption & SHA-256 hashing**, ensuring **100% integrity & confidentiality** of transmitted files. This project significantly enhances data protection for **sensitive information**, reinforcing a strong commitment to cybersecurity best practices.

**SimuPhish** | *Phishing simulation platform for cybersecurity training.*

- Developed a **phishing simulation tool** using **Flask**, which heightened organizational cybersecurity awareness by enabling users to **recognize and effectively respond to phishing attempts** through **realistic email simulations**. This initiative improved staff training and preparedness against social engineering attacks.

## Achievements

**Certifications:** Google Cybersecurity Professional - Google & Coursera. **Ethical Hacking** - NPTEL

**Women Engineer Scholar:** Selected as a **2023 Women Engineer Scholar**, ranking in the **top 1% among 27,000** applicants for the TalentSprint-Google supported program.

**Publications:** Authored **5+ publications** in conferences, journals, and book chapters, showcasing contributions to the field.

**Hackathons:** Two-time finalist in the **Smart India Hackathon (SIH)**, **1st place** in **Cyber Colloquy 3.0: Deepfake Discovery Global Hackathon** (Rs. 5,000 prize), and Rs. 50,000 in the **Intel-IITK Hackathon 2024**. Ranked **4th out of 40+ teams** in the **PASSWORD CTF (VIT-C)** and a **finalist** in **EncryptID, VishwaCTF, BITs & PragyaanCTF**, demonstrating strong cybersecurity commitment.
