Education

Shiv Nadar University, Chennai

Bachelor of Technology in Computer Science and Engineering, specializing in Cybersecurity.

Expected August 2026

Chennai, Tamil Nadu

Skills

Languages: C/C++, Python, Java, JavaScript, HTML/CSS, SQL, Solidity, Scala, Kotlin, Haskell, Shell & Bash Scripting, Typescript.

Tools & Technologies: Git, NodeJS, ReactJS, ElectronJS, Flask, Django, NextJS, ELK Stack, ViteJS, Power BI, Wireshark, Firebase, FastAPI, Bootstrap, MySQL, MongoDB, Neo4j, AWS, GCP.

Soft Skills: Project Leadership, Effective Communication, Agile Adaptability, Analytical Problem Solving, Collaborative Teamwork, Strategic Planning.

Experience

OneTrust

Software Developer Intern

June 2024 – Sept 2024

Bangalore, Karnataka

- Engineered and optimized **RESTful APIs using Java Spring Boot** to streamline data flow across systems, collaborating on **automated regression testing** to enhance the *scalability, reliability, and deployment efficiency* of critical applications.

IAS-INSANA-NAS

Summer Research Fellow

May 2024 – July 2024

Dharwad, Karnataka

- Contributed to research on **visual-based malware classification** with a **98% accuracy improvement**, focusing on scalable **image processing and distributed system** techniques to handle *data-intensive tasks, automation, and enhanced security protocols*.

Projects

DataVeilAPI | *Django REST API implementing eight techniques for comprehensive data anonymization.*

- Developed a comprehensive **Django REST API** for data anonymization, implementing **eight advanced techniques** to safeguard sensitive information. Ensured comprehensive privacy and security, reflecting a strong understanding of backend development and data protection practices.

SecuScan | *Automated vulnerability scanning for project dependencies through a VS Code extension.*

- Designed and implemented a **VS Code extension** using **TypeScript and Webpack** to automate vulnerability scanning of project dependencies. Reduced **manual scanning efforts by 40%** and enhanced security insights through seamless integration with the **NVD API**, demonstrating capability in developing tools that significantly improve software security.

WebShield | *Phishing detection Chrome extension with ML integration.*

- Created a highly effective phishing detection solution with a **Chrome extension** utilizing **ReactJS, Bootstrap, FastAPI, and Firebase**. Achieved **98% accuracy across five machine learning models**, significantly enhancing online security and illustrating expertise in frontend and backend integration.

SecureDash | *Real-time monitoring dashboard enhancing Smart Grid security.*

- Constructed a sophisticated **real-time monitoring dashboard** using **ElectronJS, HTML/CSS, and JavaScript**, integrated with **Flask and PowerBI**. Improved **Smart Grid security by 90%** through advanced machine learning techniques, highlighting skills in data visualization and real-time analytics.

AirPic | *Gesture-controlled android app utilizing ML for intuitive user interaction.*

- Spearheaded the development of a **gesture-controlled application** using **Kotlin, CameraX, and Material UI**, featuring **TensorFlow-Keras** for **gesture recognition capabilities**. This innovative project showcases creativity in user interface design and mobile application development.

PenGUIN | *Linux application for streamlined OS hardening with a user-friendly interface.*

- Co-developed a **Linux application** using **PyGTK and Shell Script**, streamlining **OS hardening on Ubuntu**. Delivered a **user-friendly interface** with one-click access to **essential features**, emphasizing skills in software engineering and system security.

Achievements

Women Engineer Scholar: Selected as a **2023 Women Engineer Scholar**, ranking in the **top 1% among 27,000** applicants for the TalentSprint-Google supported program.

Publications: Authored **5+ publications** in conferences, journals, and book chapters, showcasing contributions to the field.

Hackathons : **Two-time finalist** in the **Smart India Hackathon (SIH)**. Awarded **first prize** in Cyber Colloquy 3.0: Deepfake Discovery Global Hackathon, with a cash prize of **Rs. 5,000**. Secured **Rs. 50,000** in the **Intel-IITK Hackathon 2024**.
